Registration for Workshop on Protocols for Measurement and Verification of Energy Savings

August 18, 1998 – 8:00 a.m. to 4:00 p.m. Pacific Tower, 8th Floor, 1001 Bishop Street, Honolulu, Hawaii

Presenter: Steve Kromer Lawrence Berkeley National Laboratory

Installing energy efficient technologies such as lighting, efficient motors, efficient refrigeration and air-conditioning provide energy cost savings to facilities. Financing the installation of these improvements may be achieved through energy savings performance contracting, utility rebates, and/or utility basic ordering agreements, among others. In January 1997, Mr. Kromer presented a Workshop on Baseline, Measurement, and Verification of Energy Efficient Technologies. This follow-up Workshop reviews principles of measurement techniques and recent updates in protocols for measurement and verification.

WORKSHOP OBJECTIVES

- To educate all parties involved in energy efficiency improvements to recognize and understand the importance of verifying and measuring energy savings through the use of consistent, impartial, reliable and repeatable methodologies; and
- To address guidelines that can be used to document and report verifiable energy savings, particularly when private sector financing, performance-based energy services, and utility rebates are involved.

WHO SHOULD ATTEND

Building and facility managers, procurement specialists, Energy Service Companies (ESCO), utilities, federal, state, county representatives interested in verifying energy savings.

*

DEADLINE for Registration: 4:00 p.m., Wednesday, August 12, 1998. Fax or mail this form to:

M&V Workshop, DBEDT-Energy, Resources, and Technology Division P.O. Box 2359, Honolulu, HI 96804-2359, Attention: Elizabeth Raman; Fax (808) 587-3820

Yes, I want to attend
